

REMARKS

Claims 11-21 are pending in the present application. Applicant notes with appreciation the indication that the claims are allowable. Favorable consideration is respectfully requested.

The specification was objected to because it did not include headings and because it did not provide a brief description of the allegedly newly submitted drawing. With respect to the first objection, amendments have been made herein to provide the specification with the appropriate headings. Applicant respectfully submits that the Second Substitute Specification includes no new matter.

With respect to the cited newly submitted drawing, Applicant respectfully submits that this drawing was part of the specification as originally filed as a table (reference is made to page 23 of the originally filed specification). Applicant has amended the specification to provide a table number for this page. For these reasons, Applicant respectfully requests reconsideration and withdrawal of the objections to the specification.
